

## Keytouch IEC 60945 approved Keyboard series

The Keytouch keyboard series of products has been developed to meet the specific needs and demands of the maritime market.

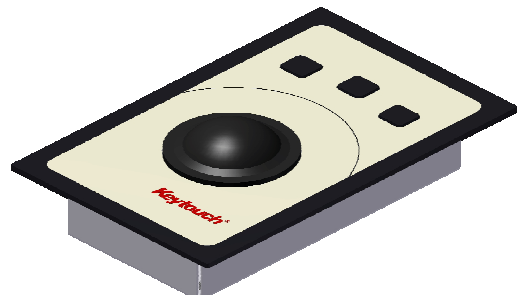

All units have been designed for maximum flexibility to allow the user to adapt a standard unit to their specific need with very little additional development, time and cost.

Keytouch keyboard series components:

- QWERTY keyboard with trackball
- QWERTY keyboard
- Function/numeric keypad
- Joystick
- Trackball

The individual components of the keyboard series can be stand alone units or utilized with the other Keytouch units. Each key on all the keyboards can be individually labeled and can generate the user's required keycodes. Sequenced key codes can also be generated on a single key. The Keytouch keyboard is backlit and provides a distinct tactile feel.

The Keytouch keyboard series can be adapted to meet individual OEM customer color, logo and design requirements.
