

PRESS RELEASE

Keytouch Technology AS has signed a renewed contract with Siemens AS, Oil&Gas and Marine for the supply of a range of control panels for Siemens propulsion systems, World Wide.

Author: Eva H. Edvardsen
Published: 17.06.2015

Keytouch Technology and Siemens engineers previously designed and developed a control panel together for the usage on Siemens propulsion systems. Keytouch Technology has supplied control panels for Siemens installations on various types of vessels worldwide throughout the last couple of years.

Keytouch and Siemens has renegotiated a new contract for further long-term deliveries of these products, where Keytouch will manufacture and support the products for years to come.

This new contract testifies a secure, stable and close cooperation between the parties, where there has been established a strong confidence in Keytouch, in terms of quality, delivery reliability, service and innovative product development and manufacturing.

Siemens requirements for quality, safety, operational and project management, makes us a better supplier and confirms our leading position in the market.
